I recently purchased a condo, and the plumber mas incorrectly installed the dishwasher. The result was water dripping down underneath my granite top and getting the underside/non-treated/non-polished of the granite wet. Is this a problem? Could this have damaged my couunter-top?

Dear Cavan:

â€œ Could this have damaged my couunter-top? â€•

I highly doubt it. However the situation must be rectified. There's no telling what the water could do to your stone in the long run.

Now remember, it's never too early to think about the proper maintenance of your stone. ***The issue of what you'll be doing day in and day out to your stone is â€œ as it should be intuitive â€œ vastly more important than its sealing*** (if and when possible and/or advisable) and it's all too often neglected. As you can tell by reading many of this site's postings, you're not likely to get good information about routine care from your dealer or installer. Don't become another statistic! By logging into the Helpful Hints section of our website at: [http://www.mbstone.com/HH\\_promo/helpful\\_hints.htm](http://www.mbstone.com/HH_promo/helpful_hints.htm) , you will be able to get the short version of our maintenance guidelines at no charge. The full version of it â€œ a 7-page document considered by many as an industry benchmark â€œ is available in pay- per-download format in our Educational Literature section at: <http://www.mbstone.com/literature/literature.htm> .

And remember, every single penny of the cost of the literature will be used to support this site and its cause: **your** cause.

While you are in the â€œHelpful Hintsâ€• section, do spend some time reading all of the interesting FREE articles you'll find in there!

Finally, keep in mind that we need your support to help us helping you!
