"Scrubbling Bubbles" cleaner (contents n-Alayl -60% ammonium chloride)accidently released on Black slate tile staining them a drak gray.How can I get them back to their black color

Dear John:

If the stone gets back to its original color when wet, then the application of a good quality stone color enhancer like MB-6 will do the trick for you by giving you the "wet look" (without any sheen) permanently.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm> ?

Ciao and good luck,

Maurizio Bertoli
