Hi Maurizio, I work at an architecture firm and one of our clients wants the same flooring in their indoor kitchen and the connecting outdoor patio. I know you don't recommend using limestone as flooring- could you recommend a compatible stone that works well for both indoor and outdoor flooring?

Dear Min:

Compatible to what?...

Do you mean that it may look like limestone?

Well, how about a good dolostone like Ramon Jerusalem limestone?

Or even better, Giallo Atlantico marble (from Egypt) hone finished?

Another good candidate could be a another dolostone like Emperador Light (it's trade as marble), again hone-finished.

And then, of course, hone-finished travertine!

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>

Ciao and good luck,

Maurizio Bertoli
