

Products to use for Bordeaux (sunset red) granite care

Authored by: **Maurizio Bertoli** [mailto:mail@mbstone.com]

Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=1152>

Product is one year old, has small dull spot from a splash of jewelry cleaner. Cleaner has an ammonia smell. Also white spots near faucet from water. What products do I need to use now, and for the future?

Dear Susan:

Ammonia would have never damaged a tough cookie like Sun Set, from good old Texas ! There must have been some strong acid (HF?) in its formula to create damage with only a splash.

That said, your porphyritic granite doesn't need anything different than any other granite (or :graniteâ€•) out there.

By logging into the Helpful Hints section of our website at: http://www.mbstone.com/HH_promo/helpful_hints.htm , you will be able to get the short version of our maintenance guidelines at no charge. The full version of it â€œ a 7-page document considered by many as an industry benchmark â€œ is available in pay-per-download format in our Educational Literature section at: <http://www.mbstone.com/literature/literature.htm> .

And remember, every single penny of the cost of the literature will be used to support this site and its cause: **your** cause.

While you are in the â€œHelpful Hintsâ€• section, do spend some time reading all of the interesting FREE articles you'll find in there!

Finally, keep in mind that we need your support to help us helping you!
