Hi Maurizio, I am considering using bluestone for my kitchen and bathroom countertops. I understand they are prone to staining but was wondering if I could effectively seal them with a sealer or wax? Thank you, Kevin

Dear Kevin:

â€œ was wondering if I could effectively seal them with a sealer or wax? â€•

First off, a wax has nothing to do with sealing. Second, the answer to your question is, no. No sealer for stone can guarantee effective sealing on *any* stone that could be sealed, let alone a sponge like bluestone.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
