Where can I buy a product to get the mildew or fungus out of my travertine shower floors? where can I buy here in Chula Vista CA,in San Diego County?

Dear Laura:

MB-9 is €œyour man€•. It is not available in stores in your area, but you can get it online at:
<http://www.mbstonecare.com>.

The real question is: why do you have mildew in your travertine shower stall?

Mildew is seldom the consequence of lax housekeeping: in all too many cases it is the indication of water (and lots of it) behind and under the tiles, that has found its way in through missing or damaged grout.

So check to make sure that it is not your case, because it would represent an installation failure and the mildew itself would not be the bad news, but just its reporter.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
