---

Please tell me what products to use to clean my black honed greanite in my kitchen. Thank You

Dear Maria:

The finish of the stone doesn't make any difference in the choice of the cleaning agent. Therefore MB-5 is my recommendation.

However, the finish of the stone in this particular case could create cleaning problems if it was not treated with a good-quality stone color enhancer instead of nothing or a regular impregnating sealer. What I mean is that hone-finished black granite is a difficult surface to maintain unless treated with a good-quality stone color-enhancer because of the surface staining that will occur. And those surface soiling will be difficult to clean even with the best cleaning product.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>  
?

Ciao and good luck,

Mauri z io Bertoli
