---

Dear Mario: Is Laticrete SpectraLOCK Pro grout, which is an epoxy grout, appropriate to use on our crema europa bathroom floor tiles? Will the epoxy grout remover that may be necessary damage the floor? Thank you for your help. DEK

Dear Dan:

Mario is not here today, but I will try to do my best! J

The answer to your question is: I have no idea. I really don't know much about every grout there is out there (and I can assure you that even Mario doesn't know much about it, either!... J )

While the grout itself will be fine, to find out if the grout remover is safe on natural stone your best bet is to ask the manufacturer of the product.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm> ?

Ciao and good luck,

Maurizio Bertoli
