Hi, I am interested in the MB-4 product to seal my granite counter top. I have two questions - 1) Is MB-4 the right product to seal the granite counter top or is there something else you recommend? 2) What is the shelf-life of the product? If I buy the product today, will it still be good a year or two from now? Thank you! -j

Dear jkk:

Yes, it will last many years. But before you do anything, are you sure that your granite can be sealed at all?

To find out do this:

Spill some water in a couple of spots of your stone, let it dwell for 5 minutes or so, wipe it dry and observe if the areas under which the water has been sitting have become (temporarily) any darker than the rest. If so, then you will apply a good-quality impregnating sealer like MB-4. If not, you won't.

Now remember, it's never too early to think about the proper maintenance of your stone. ***The issue of what you'll be doing day in and day out to your stone is "as it should be intuitive" vastly more important than its sealing*** (if and when possible and/or advisable) and it's all too often neglected. As you can tell by reading many of this site's postings, you're not likely to get good information about routine care from your dealer or installer. Don't become another statistic! By logging into the Helpful Hints section of our website at: http://www.mbstone.com/HH_promo/helpful_hints.htm, you will be able to get the short version of our maintenance guidelines at no charge. The full version of it "a 7-page document considered by many as an industry benchmark" is available in pay-per-download format in our Educational Literature section at: <http://www.mbstone.com/literature/literature.htm>.
