

crema marfil with water spots

Authored by: **Maurizio Bertoli** [mailto:mbstone.com]

Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=1401>

My bathroom countertop is a beautiful polished crema marfil slab. Unfortunately, there are what I believe to be water or soap "marks" surrounding the opening for the undermount sink. From reading some of Q+A on your very helpful website, it appears that MB-11 might be helpful. If it is effective in removing these marks, how do I care for the polished marble thereafter to prevent these marks from reoccurring? Thank you in advance for your assistance.

Dear Sue:

• If it is effective in removing these marks •

Yes, it is

• how do I care for the polished marble thereafter to prevent these marks from reoccurring? •

You can't prevent those types of light surface damages from occurring. It is the nature of most marbles and it can't be helped, with a sealer or whatnot. L

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm> ?

Ciao and good luck,

Maurizio Bertoli
