Q. My polished marble kitchen floor has been installed for 20 years and I have been searching for a good cleaner that I can use myself. Please help.

Angela

A. There are hundreds of cleaners on the market and many are good but there are a couple of things you should look for: First make sure the cleaner is specific for the type of stone it is being used on, especially marble. Second make sure the cleaner has a neutral pH. MB Stonecare MB1 has been created specifically for natural stone. You can find it at <http://www.mbstonecare.com>
