---

Q. I want to "seal" my Alabama white marble backsplash and honed alabama white countertop to protect it to the extent it can be protected, but I don't want to change the color. What impregnator do you recommend?

A. Use MB-Stonecare MB-4. ([www.mbstonecare.com](http://www.mbstonecare.com)) It will not change the color. However, it's always best to test on an inconspicuous area first.

Keep in mind that the sealer will not protect your stone from etching, so be careful to avoid acidic spills. If spills do occur, clean them up as quickly as possible.
