Q.I have a stain on my bathroom counter top which is crema marfil. I believe it is from my can of Scrubbin Bubbles. There are a few dull marks on it also. You cannot see the stains if you are standing in front of the vanity, but I can see them if I look in the mirror. I hope you can help me.

A. Scrubbing bubbles are like gremlins to marble surfaces. It's a disinfectant that isn't compatible for stone. It sounds like the etching you have is light enough to remove with our MB-11 product.

Maurizio called it happiness in a bottle.

Hopefully you will too. Read the instructions carefully.

If this doesn't do the trick you will need a pro.
