Q.Dear Sir: My granite counter top is unlevel at one seem about 1/8t of an inch. It seems to have popped up on the right side of the seem. One can push it down but it does not stay level. How do I repair this or does it have to be repaired by a skilled person who has worked on ganite tops? Sincerely, Fred milhous

A.Hi Fred,

Call your local fabricator or stone refinisher and see if you can get them to stop by and check it out.It doesnt sound like anything major.But if done correctly it wont be popping back up anytime soon.

Hey if you need a pro check out www.stoneandtilepros.com
