Q.Hi, Could you take the time to tell me the proper method for installing a soapstone shower slab base? Mud bed or not? Rubber membrane or not? Just lay on floor boards or not? etc... Also, What grout should i use if i space the soapstone wall tiles at 3/16" width and larger? Thank You, Rob

Hi Rob-post your question over at the john bridge forum.

They are installation experts and can help you.

One thing keep your joints at 1/16 and use unsanded grout.
