Q.What can I use to remove mildew that has settled into the "pitting" of the marble. I've tried a soft brush but it it's no use in the deeper areas of some tiles How can I get in there to get it out?

Hi Joanne,

Dont throw away the soft brush just yet. Spray on our mb-9 mold and mildew remover(agitate the product with your soft brush) let it sit on and in the moldy areas for five minutes or so then rinse that ugly stuff away.
