Q.This is my second attempt at sending a message asking how to remove the water film over the green granite when the sun shines on it.

A. Hi Rona- I dont know what you mean by water film.

What I think you are seeing is a film let on by the cleaner you are using. Its that greasy streaky thing that the residue from your granite cleaner may be leaving.

Switch cleaners-Its as simple as that.

Use our mb-5 and you will never have greasy streaks.
