Q.i finished a marble floor and seal it with stone enhancer from roval, after the did constrution work for about another month, the floors were covered but you find some painter's tape glue and the floors look dirty and a little doll. what can i use to clean it? should i use a buffer? ubaldo valiente 813-924-3935

A. Hey Ubaldo, Its hard to comment with so little info given. Is this a polished or honed floor ? What type of marble is it? How was the enhancer applied?

Did you use sanded or unsanded grout. To remove adhesive use acetone. We do a lot of post construction cleanups sometimes having to involve the removal of grout and or sealer residue. To clean the floor we have a great heavy duty cleaner MB-2. It requires a dwell time and good rinsing. As far as a buffer using a grout cleaning brush and a wet vac would be a good idea.
