Q.I am a fabricator of granite and marble countertops and we have begun working extensively with outdoor kitchens. What are the best products to use for any seamwork on outdoor litchens in the NJ zone...we deal with such variations with weather throughout the year. Your best suggestions?

A. Hi Jose- I think the best way to go is to use an acrylic glue from tenax or wood and stone. Head on over to the stone advice forum,they are fabricators and will help you.
