---

Q.Can MB-11 be used to remove water stains from granite countertops in faucet area? The pattern is Dakota Mahogany.

A. Hello- Quite possibly. MB-11 is primarily for removing small etch marks on marble. However , gently at a 45 degree angle use a razor blade to remove the surface staining from the water. The razor should lift off the stain if held correctly. Then you could mix the mb-11 with water into a paste and use a soft rag to rub out the rest of the stain. Dont be afraid to use a little pressure.

Dont forget to protect the faucets. Use blue tape on the lower areas. Good luck!
