---

Q. I recently installed 18x18 honed travertine floor tile. I would like to have a wet look and was wondering if MB Stonecare MB-6 color enhancer/sealer would be enough for sealing along with enhancing the color? Or should I first use the MB-4 Impregnating Sealer and then the MB-6?

A. Yes. MB-6 will provide excellent protection from water and oil based stains. It will also enhance the colors of your stone very nicely. Make sure you read the directions and remove all the residue of the product from the surface of the stone.

If you want to have a pro do it, you can find one in your area by going to the Find a PRO section at [www.stoneandtilepros.com](http://www.stoneandtilepros.com).
