

Tropic Brown Granite

Authored by: **Maurizio Bertoli** [mailto:mbstone.com]

Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=292>

I just had tropic brown granite installed as my kitchen counters. It doesn't have a shine to it. What can I do to shine it, seal it, and keep it clean on a daily basis? I'm very confused on which of your products to use? Thanks for all your help and information. Sharon

Dear Sharon:

If your stone is not polished, you have some serious problem that could certainly not be solved with anything coming in a bottle. Stone is polished by abrasion and friction (like gemstone) by the factory with state-of-the-art sophisticate \$1 million polishing lines, not by slapping some sealer on it. If the slab was not polished properly, it's a structural problem that you will have to work out with your fabricator and whoever sold that slab to you.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
