Do you have a mastic product for filling holes in travertine? Can you recommend a brand name and supplier in Florida? Thank you.

Dear Linda :

Good ol' unsanded grout (latex modified mixed with additional latex instead of water), will do the trick for you.

That if you have to fill a whole floor or something. If you have to fill just a few holes, color-matching caulking material will work like a charm!

Now, I don't need to tell you where to get grout or caulking material, do I?... J

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
? J

Ciao and good luck,

Maurizio Bertoli
