

Marble sealer for outdoor marble ?

Authored by: **Maurizio Bertoli** [mailto:mbstone.com]

Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=305>

I just took my marble table outdoor about a month ago. Now it's getting dull. Please, recommend a stone care product so it can be left outside (Temp: 20-100 degree F). Thanks You so much.

Dear Yen:

Q.: " Please, recommend a stone care product so it can be left outside (Temp: 20-100 degree F)."

A.: None known to man.

Polished marble does not belong in a kitchen and does not belong outdoors. Never did, never will. End of the debate. :-(
The acidity of the rain (5.6 pH) will coorde its surface, and no sealer for stone will ever be able to prevent that.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
