My wife wants a bluestone slab counter top like one we saw recently installed at another house. At that house the homeowner stated that she sealed it with a product that was safe for kitchen use, FDA approved and work great. It would look great in our kitchen but I' What do you think about this application for a bluestone and our success at sealing it?

H Victor

Dear H. Victor:

I wouldn't sandstone (bluestone) countertop in my kitchen and then having to rely on somethin in a bottle to enjoy it, not even if they'd give me money to get it!

But then again, my wife and I cook like maniacs and actually use and abuse our kitchen... :-)

May I ask you now to please read and e-sign our Statement of Purpose at:
