

chips and pits in durango floor

Authored by: **Maurizio Bertoli** [mailto:mail@mbstone.com]

Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=388>

We have 24inch square Durango tiles in our kitchen, 3/8 inch thick. I have noticed lately many pits and small holes in the floor. How do I fix them and where can I get the products to fill the holes and make it match?

Dear Dan:

Use color matching caulk. Apply it with a flexible putty knife and then save it with a razor or blade. Let it cure for a couple of hours, and then enjoy!

Why didn't they tell you that at the store where you bought the stuff?... Does the world need marblecleaning.org or what?...

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>? J

Ciao and good luck,

Maurizio Bertoli
