Maurizio -- Aiuta per favore! My cleaning woman used a bleach bathroom cleaner on my green slate shower tiles and now the tiles have whitish streaks and have lost their rich color. What can I do to help make the tiles look better and restore the color? Grazie tante!

Dear Andrea:

Not much, really... :-(

From a strictly technical point of view, that is. However, the streaks "disappear" when the stone is wet, right?

If so, then the application of a good-quality stone color enhancer like MB-6 will give you the same visual result permanently.

Other than that...

May I ask you now to please read and e-sign our Statement of Purpose at: http://www.marblecleaning.org/purpose.htm?_J

Ciao and good luck,

Maurizio Bertoli
