hello, we are in the process of having travertine installed in our shower (right in the middle of it) I asked them to put granite on the step of the shower going in as a different look. I saw it in a magazine....Now I'm wondering if what I saw was marble? after the fact... I tried searching for "granite in shower" on your site with no luck. Was this a mistake?? I have bought the products you have suggested for maintaining my shower but now I'm nervous about the granite decision. Please Please give advice. Thank You. Kim

Dear Kim:

Is there any particular reason why you're concerned?...

I never get involved in decorating, but from a mechanic point of view a granite threshold for a shower stall is a terrific choice.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm> ? J

Ciao and good luck,

Maurizio Bertoli
