Is this product OK to use on granite? I have rings on my granite countertop from where the soap detergent bottle sat. The rings are either water marks or soap file, in either case they don't come off. Thank you.

Dear Sheila:

Right off the bat, I don't like what I hear. What kind of rings do you have? Could you describe them to me or, better yet, send me a picture or two?

Are they darker than your stone? What kind of granite do you have? Is it something that's sitting on the stone surface, and there's nothing on it?

Let me know so that I can help solve the "mystery"

"Til then, may I ask you now to please read and e-sign our Statement of Purpose at:
