

Water and Granite floors

Authored by: **Maurizio Bertoli** [mailto:mail@mbstone.com]

Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=750>

I had a water leak which stained my new granite floor from underneath. The contractor had installed a mudset base. Will this stain eventually evaporate through the surface or remain there?

Dear Eugene:

It should eventually evaporate, but it may take months, depending on the density of the stone and whether or not an impregnating sealer was applied to it!

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
