---

Parts of the shale is peeling off and there are little holes appearing. the holes are dull and grandular looking. How do I stop the peeling, the sink is 6 months old?

Dear Bonnie:

You can try by sacrificing a goat to the gods of stone... And if you don't have a goat, try at least with a chicken!... :-)

Other than that... :-(

Oh, I almost forgot: some salesman will eventually convince you to apply a sealer or something to your stone!

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
