---

How can you remove grout film form travertine tile. On newly installed back tile.

Dear Wayne:

If it's just a film you can remove it with a good quality alkaline cleaner with chelates in its formula rated for natural stone, like MB-3, and lots of scrubbing.

If it's a large floor you will need a professional floor machine and with red nylon pad under it.

Rinse thoroughly a couple of times and then finish with a nice clean with MB-1.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm> ?

Ciao and good luck,

Maurizio Bertoli
