dear sir, I would like to know how to protect and maintain those to product as I understand they are extremely porous so what will be the best product to use to seal them and to clean them.

Dear Sophie:

While Kolar Gold and Vyara Gold are indeed absorbent stones, Silver Sparkle is not and requires not sealer. I would therefore apply a good-quality stone impregnating sealer to the first two and skip the sealing with the latter.

After that, I would recommend for all three stones a good-quality stone cleaner and polish, like MB-5 and MB-13 for routine care, which is far more important than the sealing.

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
