Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=851>

We had granit counter tops installed and one of the pieces is much lighter in color. The installer said there is a oil that he can apply and it will darken it. What do you think? Thanks, Carl

Dear Carl:

I don't think: I know. If it is only slightly lighter a good-quality stone color enhancer like MB-6 may " and just may " work; but if there's a big difference like you seem to indicate, there are only two chances to that: No way and no how!

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
