

Travertine Paver Installation

Authored by: **Maurizio Bertoli** [mailto:mbstone.com]

Saved From: <https://marblecleaning.org/knowledgebase/article.php?id=911>

I'm installing 3cm travertine pavers around my pool in north Florida. I'm using a concrete base. Should the pavers be set in thinset/grout or in sand, and if sand is the right thing to use, what kind of sand should I use? Thanks.

Dear Tom:

I like sand.

Which sand is better, though being that you live in Florida (no freeze and thaw cycles), even thin set would be acceptable ?...

I really don't think it makes much of a difference. If you are in the Florida panhandle, that white quartz sand is wonderful! (Though you won't be seeing it!)

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm?>

Ciao and good luck,

Maurizio Bertoli
