---

I HAD AN EMPIRE WHITE GRANITE COUNTER TOP AND BACK SPLASH INSTALLED, AND BEFORE I COULD SEAL IT SOMEONE SET 3IN1 OIL ONTO IT AND SPILLED IT AND THE STAIN IS DEEP IN TO THE UNPROTECTED STONE. WHAT CAN I DO SHORT OF RIPPING OUT THE TILES AND HAVING THEM REPLACED. WHAT SEALER SHOULD I USE? ANY HELP WOULD BE APPRECIATED.

Dear Will:

I assume that you mean Imperial White.

There's no need to replace the stained tiles: the stains can be easily removed.

How?

When it comes to stain removal, either you buy one of those expensive "Professional kits" (that true professionals seldom use!) at a stone retailer near you, or you can spend less money and get our comprehensive guidelines on how to remove stains by using inexpensive and far more effective means that you may already have in your household! Such impressive piece of literature will also tell you how to tell stains apart from "oilstains", and what to do about the latter! It does carry a small price tag, and you can order it by logging on at: <http://www.mbstone.com/literature/literature.htm>. It's available in pay-per-download format and it's much cheaper than any kit on the market! Not to mention the little and much needed support you'd be giving to the cause " **your cause** - since every single penny of the cost of the article will be used to support it.

Also, will you please read and e-sign our Statement of Purpose by logging on at: <http://www.marblecleaning.org/purpose.htm>? By spreading the word about this valuable site among your friend & family and the stone trades' people you've been dealing with, you will be rendering everybody a valuable service!

Ciao and good luck,

Maurizio Bertoli
