

Leveling installed Granite Tiles

Hi: We have a customer that installed 18x18 Granite Tiles in a very short time. Apparently, they are not levelled and have visible level difference as high as 1/8 to 3/16 of an inch. Please help with the best possible solution to level this without having to take them out. Thanks Anand

Dear Anand:

Technically it is doable, butâ€¦! You've got to find the right stone restoration contractor with the right equipment (\$15,000 minimum the machine alone) and the right know-how to tackle a job like that. Anybody who would bid less than \$20/sq.ft should be thrown out of the premises.

Are you getting my drift?... I think so! J

May I ask you now to please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm>
