---

We would like to install a slab of granite onto the shower wall. While we have the walls open are there any structural precautions to take? What is the best method for adhering the stone to the backing? Are there mechanical requirements (ie wiring) or will adhesives suffice? If yes with adhesives, what about water resistance and bleed through. Just like to know what we are getting into!!! Thanks.

Dear D.:

Your query is more complicated than usual. Please, understand that we're here to help, but there's only so much free time that we can allot to answer all the queries we receive. For complicated inquiries like yours we must ask you to use our convenient "1-on-1" consultation service that's available in the

[http://www.mbstone.com/training/training\\_ &\\_consultation.htm](http://www.mbstone.com/training/training_&_consultation.htm). Bear in mind that by purchasing that service you will be supporting the cause of this site, which is **your** cause, because not a single penny of the consultation fee will end up in the pockets of any of the experts participating to this forum. All money will be reinvested for the promotion of the site, which represents your only possible tool to have your voice heard within the stone industry.

I hope you can appreciate that.

Also, will you please read and e-sign our Statement of Purpose at: <http://www.marblecleaning.org/purpose.htm?>

By spreading the word about this valuable site among your friend & family and the stone trades' people you've been dealing with, you will be rendering everybody a valuable service!

Thank you

Ciao and good luck,

Maurizio Bertoli
